Covid update

Publication Date:
Tuesday 2 November
2021

Surrey COVID-19 Summary Cases and Rates

For more detail please see full report at www.surreycc.gov.uk/covidcases

Change**

New cases in last 7 days

5,299

Rate for the last 7 days*

441.6

Data shown for time period Sunday 24 October 2021 to Saturday 30 October 2021

*Rate represents number of cases per 100,000 population for the last 7 days
**Changes are relative to the previous 7 days (17 October - 23 October). If there is an increase of less than 10%, a grey arrow will indicate that the rate may have plateaued, but is not showing a significant rise or drop

Change**		Cases (7 days)	Rate (7 days)	% Change**
↓	Surrey Heath	542	607.6	-22%
↓	Waverley	641	506.5	-18%
↓	Mole Valley	424	484.3	-13%
↓	Reigate and Banstead	704	471.7	-16%
↓	Woking	445	445.0	-30%
→	Epsom and Ewell	359	443.2	-6%
↓	Elmbridge	593	432.2	-14%
→	Tandridge	366	413.4	-6%
↓	Spelthorne	397	397.5	-26%
↓	Runnymede	354	391.9	-26%
↓	Guildford	474	315.3	-34%
↓	Surrey	5,299	441.6	-20%
↓	South East	40,769	442.3	-18%
↓	England	230,254	407.2	-15%

All data is publicly available. Data is shown by specimen date - reporting delays mean data can be incomplete for the most recent days. For this reason the data shown is for the seven-day period ending four days prior to the publication date. The rate is calculated daily by Surrey County Council Public Health data intelligence team using the ONS 2019 mid-year population estimates. The 7-day average line on the chart is calculated using the average of cases for three days before, the date itself and the three days after any specific date. The average is not calculated for the most recent three dates as there is not enough data. For more detail please refer to the Surrey COVID Intelligence Summary at www.surreycc.gov.uk/covidcases and coronavirus.data.gov.uk

Staying safe this winter

NHS

Top up your immunity this winter.

Vaccines are the best protection we have against dangerous viruses like flu and COVID-19. Find out if you're eligible for these two essential vaccines now at nhs.uk/wintervaccinations

- ✓ Get vaccinated
- 🌿 Let the fresh air in, or meet outside
- 🧑‍🤝‍🧑 Wear a face covering in crowded spaces or on transport
- 🩺 Test regularly
- 🏠 Stay at home if you are unwell
- 🧼 Wash your hands
- 📱 Continue to use the Covid-19 app

Public Health England

Respiratory Syncytial Virus (RSV) can be more severe in:

- premature babies
- babies under 2 months
- vulnerable infants with certain underlying conditions (e.g. born prematurely or with a heart condition or respiratory illness) that increase their risk of acute lower respiratory tract infection

Infection Prevention and Control

NHS
Ashford and St. Peter's Hospitals
NHS Foundation Trust

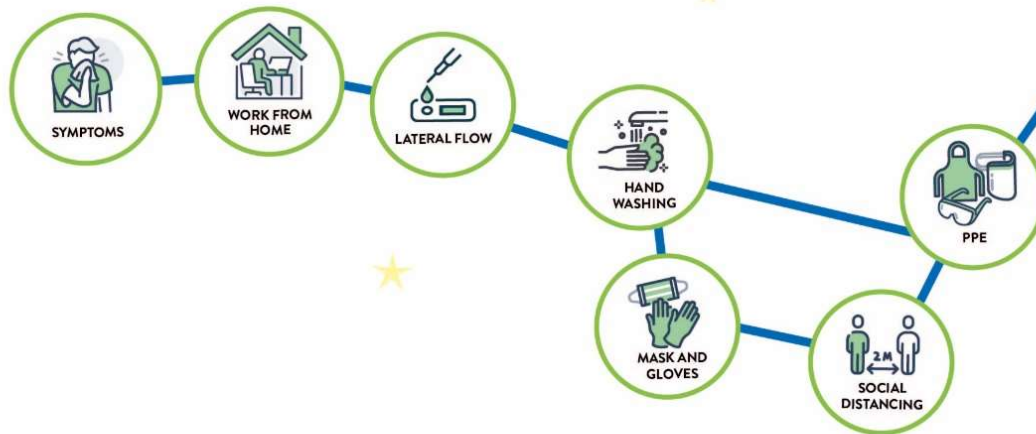

FOCUS ON THE NORTH STAR OBJECTIVE

ACTIVITY THAT MINIMISES TRANSMISSION TAKES PRIORITY

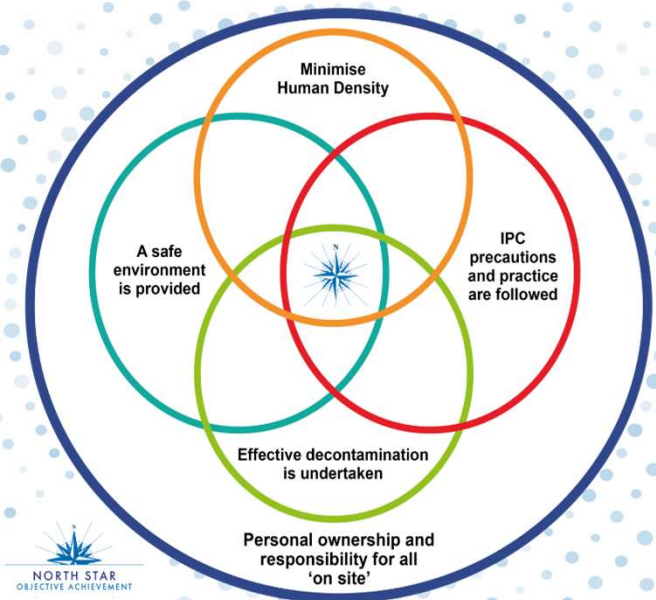

No matter where you are or your job role within the organisation, we all need to work together, stay on course and learn from practice across the organisation and beyond.
